

Selecting the Change Password button in the main menu will display the change password window where the user is asked to enter the old password, enter a new password, and then to confirm the new password

If the passwords all match and the old one is correct, the following dialog will be displayed notifying the user that the password was changed

If the old password entered doesn't match the one saved on file, the following error dialog will be displayed.

If the new password entered don't match each other, the following error dialog will be displayed.
