

Change Password
Screen displayed

```
graph TD; A[/Change Password Screen displayed/] --> B{Passwords Match?}; B -- Yes --> C[/Password change successful displayed/]; B -- No --> A;
```

This flowchart illustrates the process of changing a password. It begins with a parallelogram-shaped start node labeled 'Change Password Screen displayed'. An arrow points down to a diamond-shaped decision node labeled 'Passwords Match?'. From this decision node, there are two paths: a 'Yes' path leading down to a parallelogram-shaped end node labeled 'Password change successful displayed', and a 'No' path leading right and then up to loop back to the start node.

Passwords
Match?

Yes

Password change
successful displayed

No
