
Algorithm 1 Repeat Loop

total 0 "Please enter a number (0 to finish)" *number* *total* *total* + *number*
number = 0

Algorithm 2 15 Certificate decision with else condition

"Please enter your age : " "your_age" *your_age* ≥
15 "You are old enough to go and see this film"
"You are not old enough to go and see this film"

Algorithm 3 Deciding which team won

team_one_score > *team_two_score* *winner* *team_one* *team_one_score* <
team_two_score *winner* *team_two* *winner* "Draw"

Algorithm 4 While Loop Representation

total 0 *finished* false *not finished* "Please enter a number (0 to finish)"
number *total* *total* + *number* *number* = 0 *finished* true

Algorithm 5 For Loop in pseudocode

sequence[0, 1, 2, 3, 4, 5] *item* *sequence* *item*
