

This is the window that will be displayed when the application is launched

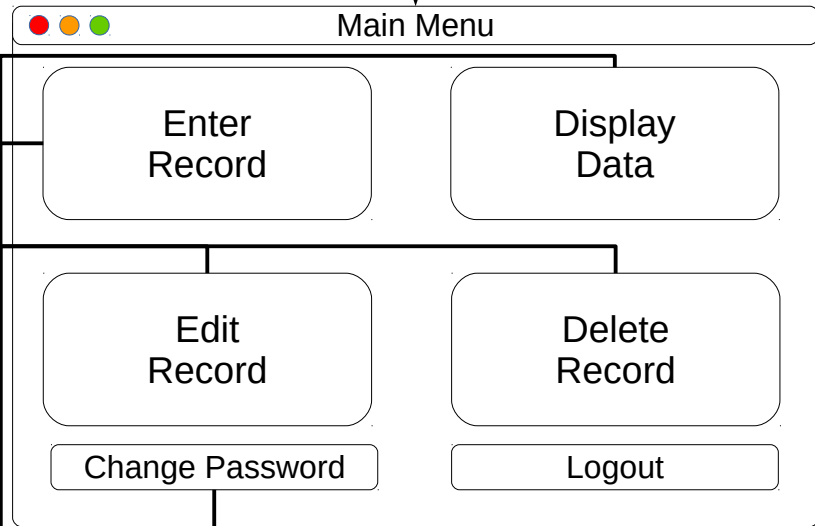

Please enter the password

Password

Cancel OK

When the OK button is clicked or enter is pressed, the application will check that the password entered matches the one on file.

After the password has been verified, the main menu window will be presented to the user. Here they will be able to select a number of options.

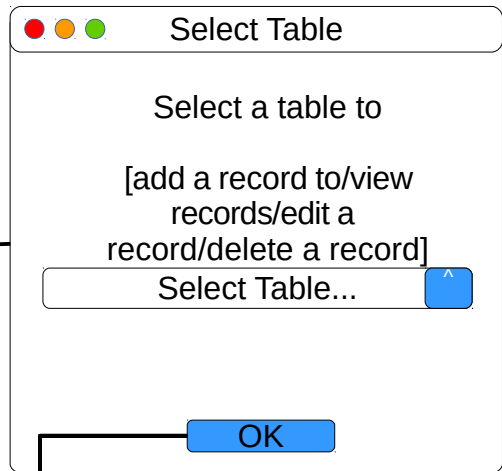

Main Menu

Enter Record      Display Data

Edit Record      Delete Record

Change Password      Logout

Once the user has selected a main menu option, they will be asked to select a table to apply the previous selection to. An appropriate message will be displayed in the label above the drop down menu

Select Table

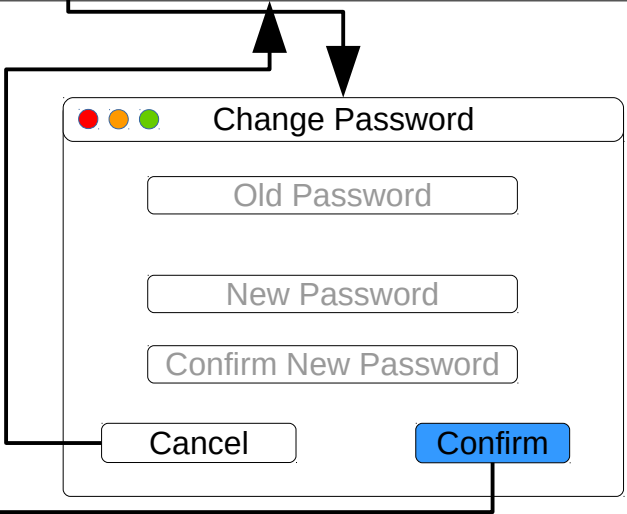

Select a table to

[add a record to/view records/edit a record/delete a record]

Select Table... ^

OK

- Add Record – Pages 48-51
- Display Data - Page
- Edit Record - Page
- Delete Record - Page

Change Password

Old Password

New Password

Confirm New Password

Cancel Confirm

When the Change Password option has been selected, the user will be prompted with the requirement to change the password. When the new password has been confirmed, they will get redirected to the main menu again
